

CURRICULUM VITAE

ALEXANDROS A. TAFLANIDIS

Associate Professor
Department of Civil and Environmental Engineering & Earth Sciences
Concurrent Associate Professor
Department of Mechanical & Aerospace Engineering
Faculty Fellow
Kellogg Institute for International Studies
University of Notre Dame

158 Fitzpatrick Hall • Notre Dame, IN 46556
Phone: (574) 631-5696 • Fax: (574) 631-9236

E-mail: a.taflanidis@nd.edu

Lab website: www.hipad.nd.edu

Personal website: <http://www.nd.edu/~cegeos/people/faculty-pages/taflanidis/>

Engineering2Empower website: www.engineering2empower.org

1. Higher Education

- Ph.D. California Institute of Technology—Civil Engineering with Minor in Control and Dynamical Systems (September 2007). *Dissertation title: Optimal Stochastic System Design and Applications to Stochastically Robust Structural Control; James L. Beck, research advisor.*
- M.S. Aristotle University of Thessaloniki—Civil and Environmental Engineering; Master’s program on “Earthquake Resistant Design of Structures” (September 2003). *Thesis title: Investigation of Passive and Active Liquid Column Mass Dampers; Demos C. Angelides and Georgios C. Manos, research advisors.*
- B.S. Aristotle University of Thessaloniki—Civil and Environmental Engineering. Major on Structural Engineering (June 2002). *Senior Thesis title: Investigation of Applications for Liquid Column Mass Dampers; Demos C. Angelides and Georgios C. Manos, thesis advisors.*

2. Positions Held

- 2012-present Associate Professor—Department of Civil and Environmental Engineering and Earth Sciences / Concurrent Associate Professor—Department of Mechanical and Aerospace Engineering, University of Notre Dame
- 2011-2012 Rooney Family Assistant Professor—Department of Civil Engineering and Geological Sciences / Concurrent Assistant Professor—Department of Mechanical and Aerospace Engineering, University of Notre Dame
- 2008-2011 Assistant Professor—Department of Civil Engineering and Geological Sciences, University of Notre Dame

- Nov. 2007-
June 2008 Post-Doctoral Fellow—Department of Civil and Environmental Engineering.
Duke University; Jeffrey T. Scruggs, research advisor. *Research topic: Application of regenerative force actuation networks to wave energy harvesting and structural control.*
- 2004-2007 G.W Housner Research Fellow—Division of Engineering and Applied Sciences.
California Institute of Technology; James L. Beck, research advisor. *Research topic: Optimal Stochastic System Design and Applications to Stochastically Robust Structural Control.*
- 2002-2003 Structural Engineer—Design and Construction firm of Kesoglou Panagiotis.
Drama, Greece.

3. Scholarships and Fellowships

- California Institute of Technology- Harold Hellwig Fellowship for the first year of Ph.D studies (2003-04) and Housner Fellowship for second-fourth year of Ph.D studies (2004-07) in California Institute of Technology.
- Aristotle University Fellowship Foundation – Konstantinos Katseas Fellowship for partial support of Ph.D studies in California Institute of Technology.
- Greek Scholarship Foundation (Greek Ministry of Education) – Scholarship for academic excellence in the Master’s program “Earthquake Resistant Design of Structures” in the Department of Civil and Environmental Engineering in Aristotle University of Thessaloniki.
- Greek Scholarship Foundation (Greek Ministry of Education) – Scholarship for academic excellence in each year of undergraduate studies (1997-2002) in the Department of Civil and Environmental Engineering in Aristotle University of Thessaloniki.

4. Distinctions, Honors, Awards

- IRIS 2012 Prize of Excellence by the Integrated European Industrial Risk Reduction System (IRIS) project for publications “Analysis and design of offshore energy conversion devices under modeling uncertainties” and “Risk assessment and sensitivity analysis for offshore wind turbines”, both authored by Taflanidis, A.A., Loukogeorgaki, E and D.C. Angelides.
- Best Young Researcher Paper award in the *1st International Conference on Soft Computing Technology in Civil, Structural and Environmental Engineering*, 2009, Madeira, Portugal, for the paper "Stochastic Subset Optimization with Response Surface Approximations for Stochastic Design" by A.A. Taflanidis.
- Award for academic excellence in entire Aristotle University of Thessaloniki in 2000-2001 by International Rotary Society of Thessaloniki

- Technical Chamber of Greece – Award for academic excellence in each year of undergraduate studies (1997-2002) in the Department of Civil and Environmental Engineering in Aristotle University of Thessaloniki.
- Ministry of Education of Greece and Greek Math Foundation – Awards (one from each) for excellence in Greek national placement exams (1997) for admittance to the Department of Civil and Environmental Engineering in Aristotle University of Thessaloniki.

5. Book and Monographs

1. **Taflanidis, A.A.** and I. Gidaris¹ (2013). “Life-cycle cost based optimal design of fluid viscous dampers” in Reliability and Optimization of Structural Systems, Der Kiureghian, A., and A. Hajian eds. American University of America Press. ISBN 978-0-9657429-0-0.
2. **Taflanidis, A.A.** and I. Gidaris (2012). “Optimal design of nonlinear viscous dampers for protection of isolated bridges” in Structural Seismic Design Optimization and Earthquake Engineering: Formulations and Applications, Plevris, V., Lagaros, N and A. Mitropoulou eds. IGI Global. ISBN 978-1-466616-40-0.
3. **Taflanidis, A.A.** (2011). “Soft computing applications in simulation based natural hazard risk assessment” in Soft Computing Methods for Civil and Structural Engineering, Tsompanakis, Y, and B.H.V. Topping eds. Saxe-Coburg Publications. ISBN 978-1-874672-56-2.
4. **Taflanidis, A.A.** (2010). “Robust stochastic design of viscous dampers for base isolation applications” in Computational Methods in Earthquake Engineering, Papadrakakis, M., Fragiadakis, M and N. Lagaros eds. Springer. ISBN: 978-94-007-0052-9.
5. **Taflanidis, A.A.** and J.L. Beck (2008). “Stochastic system design optimization using stochastic simulation” in Structural design optimization considering uncertainties. Tsompanakis, Y., Lagaros, N., and M. Papadrakakis eds. Taylor & Francis. London, UK. ISBN: 978-0-415-45260-1.

6. Refereed Publications

Journal Articles Published or in Press:

1. **Taflanidis, A.A.**, Vetter, C. and E. Loukogeorgaki “Impact of modeling and excitation uncertainties on operational and structural reliability of tension leg platforms”. *Applied Ocean Research*, 10.1016/j.apor.2013.08.004.
2. Jia, G. and **A.A. Taflanidis** (2013). “Non-parametric Stochastic Subsets Optimization for optimal reliability problems”. *Computers and Structures*, **126**: 86–99.
3. Lamprou, A., and G. Jia and **A.A. Taflanidis**. “Life-cycle seismic loss estimation and global sensitivity analysis based on stochastic ground motion modeling”. *Engineering Structures*, **54**: 192-206.

9. Invited Lectures and Addresses

1. “Soft computing applications for analysis/optimization of engineering systems under uncertainty”. California Institute of Technology, May 30th 2013, Pasadena, CA.
2. “Surrogate Modeling for Approximation of Complex Physical Processes for Natural Hazard Risk Assessment Applications”. AIR Worldwide, March 5th 2013, Boston, MA.
3. “An empowerment model for residential reconstruction in Leogane, Haiti, post the 2010 Earthquake”. Georgia Institute of Technology, September 5th 2012, Atlanta, GA.
4. “Enhancing Resilience to Natural Disasters: A Probabilistic, Simulation-Based Perspective”. University of Michigan, November 29th 2011, Ann Arbor, MI.
5. “Soft computing applications in simulation based natural hazard risk assessment”. Invited Special Lecture on 2nd *International Conference on Soft Computing Technology in Civil, Structural and Environmental Engineering*. September 6-9 2011, Crete, Greece.
6. “Rapid Assessment of Wave and Surge Risk during landfalling Hurricanes”. U.S Army Corps of Engineers, Engineer Research and Development Center, September 1st 2011, Vicksburg, MS.
7. “Natural-Hazard Risk: Quantification, Assessment and Sensitivity Analysis”. Duke University. November 19th 2010. Durham, NC.
8. “Haiti Earthquake: Lessons Learned and Identification of Needs for Rebuilding”. Duke University. November 18th 2010. Durham, NC.
9. “Computational Methods for Risk Assessment and Sensitivity Analysis”. Integrated Risk Assessment and Monitoring for Industrial Systems (IRIS) project of European Union. September 13th 2010. Zell Am See, Austria.
10. “Haiti Earthquake: Lessons Learned and Hope for the Future”. Challenges and Innovations in Civil and Environmental Engineering Lecture Series, University of Notre Dame. September 2nd 2010. Notre Dame, IN. (Co-presenter: Tracy Kijewski-Correa).

11. “Robust-Stochastic Design and Control of Structural Systems”. University of Notre Dame. February 13th 2008. Notre Dame, IN.
12. “Optimal Robust-Stochastic Design and Control of High-Performance Structural Systems”. University of California at Berkeley. January 23rd 2008. Berkeley, CA.
13. “Stochastic System Design and Applications to Stochastically Robust Structural Control”. California Institute of Technology. October 10th 2007. Pasadena, CA.
14. “Optimal Stochastic System Design and Control Applications”. University of Thessaly. June 7th 2007. Volos, Greece.
15. “Optimal System Design Using Stochastic Simulation and Applications to Structural Control”. Cornell University. April 11th 2007. Cornell, NY.

10. Grants and Sponsored Programs

Funded as PI/Co-PI:

Co-Principal Investigator (January 2013 – September 2014)
 “Rapid evaluation of storm surge and wave forecasts using the Notre Dame surrogate interpolator”— Renaissance Computing Institute (Andrew Kennedy, Principal Investigator) (\$88,314)

Principal Investigator (September 2012 – August 2013)
 “Implementation of surrogate modeling for hurricane/storm risk-assessment; application to the New Orleans region through use of CSTORM- DB/VS”—Army Corps of Engineers, (Andrew Kennedy, Co-Principal Investigator) (\$49,915)

Principal Investigator (September 2012 – August 2015)
 “Collaborative Research: Large-Scale Wave Energy Arrays: Integrated Control/Array Design in Random Seas”—National Science Foundation, CBET division, (\$187,819)

Co-Principal Investigator (April 2011-March 2013)
 “A Multi-Hazard-Resilient Residential Housing Model for Haiti: Rebuilding Communities and Livelihoods through Sustainable Partitioning”— National Collegiate Inventors & Innovators Alliance (Tracy Kijewski-Correa, Principal Investigator) (\$42,480)

Principal Investigator (January 2011 - December 2013)
 “Probabilistic Sensitivity Analysis for Seismic Risk Based on Stochastic Sampling and Focusing on Stochastic Ground Motion Modeling”—National Science Foundation, Award CMMI-1030726 (\$249,433)

Co-Principal Investigator (January 2010 - December 2012)
 “Robustness of Steel Buildings under Extreme Seismic Events: Study of Building Systems Collapse Through Multi-scale Computational Methods”—National Science Foundation, Award CMMI - 0928547 (Kapil Khandelwal, Principal Investigator) (\$249,000)

Co-Principal Investigator (August 2009 – July 2012)
“Hurricane Inundation Risk in the North Pacific Ocean”—U.S. Army Corps of Engineers.
Award W912HZ-09-C-0086 (Andrew Kennedy, Principal Investigator; Joannes Westerink Co-Principal Investigator) (\$598,033)

Co-Principal Investigator (January 2010 – December 2012)
“CYBER-EYE: A Cyber-Collaboratory for National Risk Modeling and Assessment to Mitigate the Impacts of Hurricanes in a Changing Climate”— Strategic Investment University of Notre Dame (Tracy Kijewski-Correa, Principal Investigator; Thomas Corke, Harinda Joseph Fernando, Ahsan Kareem, Andrew Kennedy, Khandelwal, Gregory Madey, Scott Morris, Joannes Westerink, Zhiliang Xu, Yongtao Zhang Co-Principal Investigators) (\$1,000,000)

Co-Principal Investigator (2009)
“Development of a Wireless Health Monitoring System for Bridge Inspection and Rating: Prototyping and Full-Scale Deployment”— Faculty Research Program, University of Notre Dame (Tracy Kijewski-Correa, Principal Investigator; Panos Antsaklis Co-Principal Investigator) (\$9,500)

11. Master’s Theses Directed

1. Alexandros Lamprou. Graduated August 2011. Thesis Title: “Probabilistic Life-Cycle cost: Assessment and sensitivity analysis through stochastic ground motion modeling for seismic hazard”
2. Dustin Mix. Expected completion: August 2013. Research Topic: Empowerment model for residential reconstruction in Haiti.

12. Doctoral Dissertations Directed

1. Gaofeng Jia. Expected completion: August 2014. Research Topic: Application of soft computing approaches for Natural Hazard risk assessment.
2. Chris Vetter. Expected completion: August 2015. Research Topic: High performance computing in probabilistic risk assessment and optimal design
3. Ioannis Gidaris. Expected completion: August 2015. Research Topic: Parsimonious modeling and optimization of infrastructure systems.
4. Juan Camilo Medina. Expected completion; August 2014. Research Topic: Optimization in face of uncertainty; a simulation-based perspective.

13. Professional Memberships

- American Society of Civil Engineers, Associate Member (since 2008)
- Earthquake Engineering Research Institute, Member (since 2010)
- Technical Chamber of Greece, Member (since 2002)
- Greek Society of Professional Civil Engineering, Member (since 2002)

- Engineering Mechanics Institute, ASCE, Member (since 2008)
- Structural Engineering Institute, ASCE, Member (since 2012)

14. Other Notable Contributions

Conference Co-Chair:

- 2012 Joint Conference of the Engineering Mechanics Institute and the 11th Joint Specialty Conference on Probabilistic Mechanics and Structural Reliability (EME/PMC 2012), June 17-20 2012. Notre Dane, IN.

Conference Editorial Board Member:

- 1st International Conference on Soft Computing Technology in Civil, Structural and Environmental Engineering. September 1-4 2009. Madeira, Portugal.
- 2nd International Conference on Soft Computing Technology in Civil, Structural and Environmental Engineering, September 6-9 2011. Chania, Greece.
- 3rd International Conference on Soft Computing Technology in Civil, Structural and Environmental Engineering, September 7-10 2013. Sardinia, Italy.

Conference Scientific Committee Member:

- ASCE International Conference on Vulnerability and Risk Analysis and Management/Fifth ASEC International Symposium on Uncertainty Modeling and Analysis. April 11-13 2011. Hyattsville, Maryland.
- ASME 2011 International Mechanical Engineering Congress and Exposition. November 11-17, Denver, Colorado.

Minisymposia and specialty conference tracks organized:

- “Analysis, Optimization and Updating of Complex Systems and Infrastructures under Uncertainty”. Special Track (with two sessions) in the *ASME 2011 International Mechanical Engineering Congress and Exposition*. November 11-17. Denver, Colorado
- “Soft computing methods for analysis, optimization and Bayesian updating of systems under uncertainty”. Minisymposium in the 2nd International Conference on Soft Computing Technology in Civil, Structural and Environmental Engineering. September 6-9 2011. Chania, Greece. Co-Organizer: Kostas Papadimitriou.
- “Robust stochastic analysis, modal updating and optimal design of engineering systems”. Minisymposium in the 2nd International Conference on Computational Methods in Earthquake Engineering and Structural Dynamics. 22-24 June 2009. Rhodes, Greece. Co-organizers: Hector Jensen, James L. Beck.

Workshop Participation:

- 2011 NSF funded Workshop on “Fundamental Research and Technology in Wave and Hydrokinetic Power Systems”, Kona, Hawaii. September 19 - 22, 2011
- Workshop on Integrated Risk Assessment and Monitoring for Industrial Systems (IRIS). Zell Am See, Austria September 12-15, 2010.
